Barrington, N. H., February 12, 1923.

We hereby certify that we have examined the foregoing accounts and find them properly vouched and correctly cast.

AUSTIN L. CALEF,
FLAVIUS J. BERRY,

Auditors.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board of Barrington:

The great problem of education in America today is the problem of providing better school facilities in rural communities. We are right in the midst of it. In Barrington it is our problem. Educators everywhere are giving thought and envolving plans so that the boys and girls of the country places can begin to have some of the advantages that come to city children. It is the right of our children to have these advantages. They will grow up to face conditions of working and living far different from those that we had to face. There will be keen competition. Whether they live in the city or in the country, they will have to compete with people most of whom have had the advantage of a high school education. For the sake of our children the schools ought to be made better at once and very much better.

The first essential of good schools is to have good teachers. During this year our schools have been well-manned with capable and earnest teachers, who are interested in the welfare of the pupils. But it is becoming increasingly difficult to get good teachers and to keep them. If we lose those we have, it will be hard to get others. Where are the young people in Barrington that are qualified and willing to teach our schools? The condition in other rural towns is much the same. Capable teachers are in demand. They are wanted in the cities and villages and you do not blame them for preferring those places. Our problem is to make teaching in our schools so attractive that we can

get good teachers. One way to do this is to increase the salaries. These teachers are worth more after this year of experience. They are worth more to other towns that will take them in a minute if they can. But they are worth still more to us for they know our children and understand our problems.

I hope that our teachers will like Barrington people so well that they will want to stay with us. Much has been done along this line but more can be done. There are countless ways in which people can do a good turn for the teacher. Friendliness quite often counts more than money in deciding these questions. Every provision should be made to make working conditions in the schoolhouses, such as they are, as good as can be. It should be made possible to have the schoolhouses comfortable without the teacher having to give her time and attention to that matter constantly.

Another essential of good schools is to have good schoolhouses. Not one of the six buildings now in use comes up to the minimum state standard with regard to lighting, heating, ventilation and sanitary arrangements. In view of the aid received from the state, there is no question but that there should be some return to the state in permanent improvement of the schoolhouses. This improvement should look to the future as well as to the present. I doubt the advisability of spending money on all the buildings now in use. They are scattered on the edges of the town and are not at all central. Would it not be better to consider the improvement and extension of transportation routes, so that schools could be located where they would serve a larger portion of the town? It looks to me as though the logical thing to plan for would be the location of one or two buildings on the state road from Dover to Northwood. This will always be the main highway of the town and will doubtless be more thickly

populated. Excepting the Pond Hill section, every part of the town is within easy reach of this highway. With good transportation the children who come to these schools will be better off and will suffer less hardship than they do now. Would it not be well to call a conference of, say twenty-five, of the representative men and women from all sections of the town to consider this problem and advise with the school board as to what is best to be done?

For this year, I recommend that the necessary alterations be made at the Pond Hill schoolhouse, putting in additional windows, providing a new heater with ventilation arrangements, partitioning off part of the room for coat rooms and chemical toilets. Adjustable furniture suited to the size of the pupils ought to take the place of that made of painted boards many years ago.

The cordial friendliness extended to me by the people of Barrington is deeply appreciated. The fidelity, good-will and friendly counsel of the school board, and the loyalty and devoted service of a faithful corps of teachers, have made me want to keep Barrington as a part of my territory and to continue to work for the interests of the boys and girls of the town.

Respectfully submitted,

O. R. McCOY,

Superintendent of Schools.

January 31, 1923.
